

PROTECTIVE VISOR COVID-19 | SIGNWORKS

Signworks protective visor with foam and velcro

Art. nr:

Signworks protective visor with and velcro for multiple uses have been developed to be used as protection against drip infection in health and care. The protection consists of a cut-out protective visor in clear PE plastic, a foam rubber strip, and a Velcro solution to attach the visor to the head.

The visor has been tested and meets the requirements according to EN166: 2001 "Eye protection", as well as for the specific requirements according to §7.2.4 - "Protection against drops and liquid splashes" with reference to PPE Regulation (EU) 2016/425. The protection meets the requirements of all points.

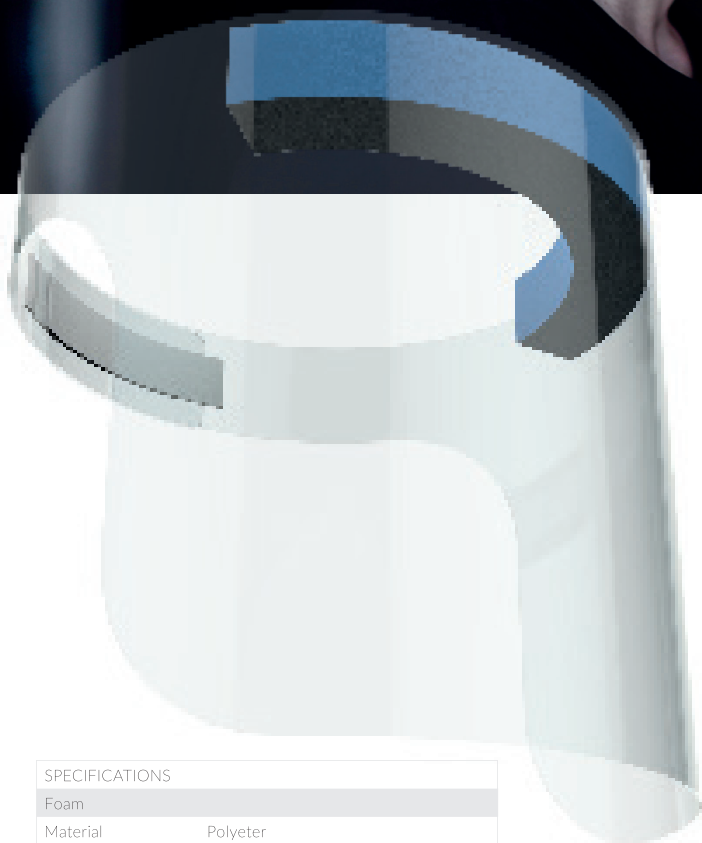

Packaging by agreement.

Visor cleaning and disinfection:

1. Wash your hands
2. Wear protective gloves
3. Disinfect all plastic parts with a large amount alcohol-based cleaner
